KELVIN OSASOGIE OSA-IZEKO

BACKEND-FOCUSED FULL-STACK DEVELOPER | PYTHON & AI/ML

Benin City, Nigeria | +234 707 991 0073 | kosaizeko@gmail.com
GitHub: github.com/koolkeyzs | LinkedIn: linkedin.com/in/kelvin-osa-izeko-686ab930a | Portfolio: kelvinosaizeko.vercel.app

PROFESSIONAL SUMMARY

Backend-focused full-stack developer experienced in building web applications and REST APIs with JavaScript, TypeScript, Node.js, Express, React, Next.js, MongoDB and PostgreSQL. Founder of Journex Technologies and creator of Journex, a full-stack journaling and community platform taken from concept to deployment. Also builds Python-based machine-learning applications, including document question-answering and fraudulent job-posting detection tools. Interested in reliable backend systems, practical AI solutions and building useful products.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python
Frontend: React.js, Next.js, Vite, Tailwind CSS
Backend: Node.js, Express.js, REST API design, Server-Sent Events (SSE), Node.js Streams, EventEmitter
Databases & data: MongoDB, PostgreSQL
AI / machine learning: scikit-learn, TF-IDF, Logistic Regression, Sentence Transformers, Gemini API, Streamlit
Tools & practices: Git, GitHub, JWT authentication, API security, Cloudinary, PDF processing, OCR (Tesseract)

SELECTED PROJECTS

ConnectFlo — Church Operations & Management Platform [Ongoing]

PostgreSQL · Express.js · React.js · Node.js (PERN) · TypeScript · Docker · Redis · Bull queues

Ongoing, large-scale multi-tenant SaaS platform that helps churches manage their people, communication, attendance and administrative operations in one centralized system. Aims to reduce reliance on WhatsApp groups, spreadsheets, paper records and manual processes through member management, attendance tracking, QR-based check-ins, role-based access control and automated communication.

AI Research Assistant

Python · Streamlit · Gemini API · Sentence Transformers · pypdf

Built a document question-answering application that extracts and processes PDF content, retrieves relevant text chunks, and generates grounded responses with Gemini. Includes source snippets to help users trace answers back to the uploaded document.

Fake Job Posting Detector

Python · scikit-learn · TF-IDF · Logistic Regression · Streamlit · PyPDF · Tesseract OCR

Developed a machine-learning application that classifies job postings as potentially fraudulent or legitimate. Supports text input and document/image uploads, using PDF extraction and OCR to read submitted content.

Journex — Faith-Centered Journaling & Community Platform

React · Node.js · Express · MongoDB

Designed, built and deployed a full-stack journaling and community platform. Implemented authentication, private journal entries, a community feed and daily scripture features. Founder and sole developer; owned the product from concept through launch.

Pathshort — URL Shortener with Real-Time Click Analytics

Node.js · Express · MongoDB · React · Recharts

Built a URL shortener with per-click analytics, including timestamps and referrers, displayed on a live dashboard. Designed the database schema and API to support redirects and click tracking. Deployed on Render and Vercel.

Ratekeep — Rate-Limited API with Live Usage Dashboard

Node.js · Express · MongoDB · React

Built a per-key API rate limiter and usage dashboard using core Node.js primitives. Used EventEmitter for decoupled request logging, MongoDB cursor-fed Transform streams for constant-memory CSV exports, and Server-Sent Events for a live request feed. Deployed on Render and Vercel.

EXPERIENCE

Founder & Developer — Journex Technologies

Founded a digital-product initiative focused on technology and community. Designed, developed and deployed Journex independently, handling frontend and backend implementation.

Freelance Full-Stack Developer

Provide backend and full-stack web development services, including REST API development, database design and authentication systems.

EDUCATION & PROFESSIONAL DEVELOPMENT

B.Eng. Chemical Engineering — University of Benin | Expected 2027

Training: The Web Developer Bootcamp (Colt Steele, Udemy) — HTML, CSS, JavaScript, DOM, Node.js, Express, MongoDB and React.
